

SAFER CHEMISTRY

"GREEN PILL" PODCAST SERIES

Rebuilding Smarter. Protecting Communities. Reducing Wildfire Risk.

The Green Pill Podcast Series is unlike anything else in the wildfire resilience space. This series is dedicated to helping property owners navigate the LA rebuild, strengthen community fire resistance, and adopt proven risk-reduction innovations that protect homes—and the firefighters who defend them.

Launching end of July 2026. Hosted by:

Steve Conboy – Nationally recognized, award-winning early fire elimination technologist
Hank Wright – Wildfire survivor who lost his home in the Palisades Fire and now advocates for safer rebuilding

Together, they'll explore cutting-edge solutions, real-world rebuilding strategies, and community-driven approaches to wildfire resilience. We want to hear your stories, answer your questions, and help families rebuild safer and stronger.

Join us for the first Green Pill Podcast and be part of the solution.
